Mohammed Raees

Unity Game Developer

Thrissur, Kerala | raees2135@gmail.com | +971 561212092 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Unity & Roblox Game Developer with 1.5+ years of professional experience developing mobile and PC games. Experienced in gameplay programming, UI systems, multiplayer, optimization, integrations, and publishing games to Google Play and App Store. Skilled in Unity, Roblox Studio, C#, Lua, Photon, Firebase, PlayFab, Addressables, Ads, IAP, and REST APIs.

SKILLS

Programming Languages: C#, Lua/Luau, C, C++

Game Engines & Platforms: Unity, Roblox Studio, Roblox

Gameplay & Systems: Gameplay Programming, Multiplayer Networking, AI Programming, UI Systems, OOP

Unity Technologies: URP, HDRP, Shader Graph, Cinemachine, Timeline, NavMesh, Animation, Addressables, AR Foundation, VR

Version Control: Git, GitHub, Perforce

Optimization: Performance Optimization, Memory Optimization, Draw Call Optimization

PROFESSIONAL EXPERIENCE

Unity Game Developer – Carina Softlabs Pvt. Ltd.
Jan 2025 – July 2026

- Developed and maintained Unity and Roblox games.
- Implemented gameplay mechanics, UI systems, multiplayer features, and integrations.
- Integrated Photon, Firebase, PlayFab, Addressables, Ads, In-App Purchases (IAP), and REST APIs.
- Optimized Unity game performance, resolved production issues, and debugged gameplay, networking, and integration-related bugs.
- Led Roblox development projects and collaborated with cross-functional teams using Git.
- Published and maintained games across Google Play, Apple App Store, and Roblox.

Python Developer (training) – CB Tech
July 2022 – Jan 2023

- Developed Python applications and scripts using core Python concepts, functions, modules, and object-oriented programming.
- Worked with Python libraries and frameworks to build and test application features.

PROJECTS

Gods Gang

View Project

Professional Project | Unity | C#

- Engineered a 2.5D action-platformer in Unity, implementing complex character abilities, combat systems, and physics-based projectiles.
- Designed and programmed scalable State-Machine AI for enemies and multi-phase boss fights, enhancing gameplay variety and challenge.

Shogun Heist
View Project

Professional Project | Roblox | Luau

- Developed gameplay systems for a multiplayer Roblox game inspired by the **Steal a Brainrot** genre.
- Implemented core mechanics involving **collecting, stealing, and managing in-game items**.
- Developed interactive gameplay systems, player interactions, UI elements, and game progression features.

Red Light Space Crew
View Project

Professional Project | Roblox | Luau

- Developed a 3D multiplayer social-deduction game inspired by the gameplay style of **Among Us.**
- Implemented core multiplayer gameplay systems, player interactions, role-based mechanics, and game progression

Battle Arena – 3D Multiplayer Shooting Game
View Project

Unity | C# | Photon

- Developed a 4v4 multiplayer shooting game using Photon networking with synchronized multiplayer gameplay.
- Implemented gameplay systems, UI, animations, and networked player interactions for a competitive multiplayer experience.
- Integrated multiplayer functionality and tested gameplay systems to ensure reliable player synchronization.

Park The Car – 3D Car Parking Simulator
View Project

Unity | C#

- Developed a 3D car parking simulator featuring realistic driving mechanics, AI pedestrians, and optimized game environments.
- Implemented gameplay systems and optimized the environment to deliver a smooth driving and parking experience.

FOXY – 2D Platform Runner
View Project

Unity | C#

- Developed a 2D platform runner featuring AI enemies, collectibles, animations, and event-driven gameplay systems.
- Implemented gameplay interactions and progression mechanics to create engaging platforming challenges.

AR Basket Ball
GitHub

Unity | C# | AR Foundation

- Developed an AR basketball game featuring realistic physics and intuitive player interactions.
- Implemented AR-based gameplay interactions to provide an immersive basketball experience.

VR Environment
GitHub

Unity | VR

- Designed and developed an immersive virtual reality environment focused on user exploration and interactive experiences.
- Implemented interactive elements and VR-based player interactions to enhance immersion.

EDUCATION

Unity Game Development 2023 - 2024
Brototype, Ernakulam

Python Development 2022 - 2023
CB Tech, Ernakulam

Bachelor of Commerce
St. Aloysius College, Thrissur 2019 - 2022

- GPA: 83
